Project:

Data Centre Expansion

Customer Remit:

To present a new fibre based network between new communications hall within SLC Data Centre.

Summary:

South Lanarkshire Council has in excess of 12,000 employees' spread throughout its large and varied area with the headquarters being in Hamilton. It is this level of staffing and the councils need for their infrastructure to be capable, reliable, and future proof.

The decision was made to expand the current Data Centre to a second hall. SSCL worked closely with the councils IT team and various other departments on exactly what was required to endure the design, installation, cost was not only effective but competitive. The installation consisted of new and vast series of fibre optic lines installed and tested to all industry standards.

Conclusion:

Due to the attention to detail and high standards achieved on the installation SSCL continue to work closely with South Lanarkshire Council.
